Summary

In this moment, I'm finishing my degree in Multimedia Communication.

Passionate by web developing, I have been exploring many branches and like to know a little bit of everything that there is to know.

For a long time, I have been lost on what I wanted to do with my future, but now, I realize I want to follow this amazing area.

In my free time, usually I go to gym where I empty my mind of all the problems for a little bit.

Some keywords that I assume that define me, are: organization, leadership, passion, effort, positivism, and respect.
